

ECG RATE (ELEC)	PPG PULSE (OPT)	BLOOD OXYGEN (SPO2)	MEAN R-R (HRV)
70 BPM	90 BPM	100 %	854 ms

Lead I Rhythm Strip (Standard Medical Calibration)

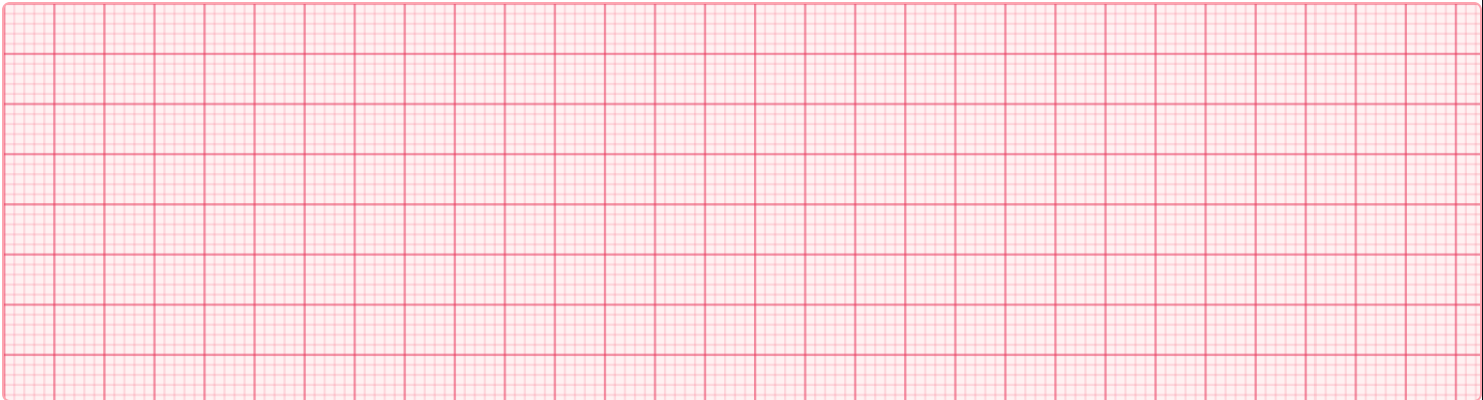

AI Automated Rhythm Verdict: Normal Sinus Rhythm (96.4% Confidence)

- Regular P-QRS-T complexes identified with normal physiological ventricular conduction.
- QRS duration is narrow (<100ms), with no evidence of premature ventricular contractions (PVC) or wide bundle branch delay.
- Dual-sensor agreement between electrical depolarization and peripheral pulse indicates optimal cardiac stroke volume.
